

## Bringing School Communities to the Forefront of Sustainable Development Action and Global Citizenship

- For the academic year 2017/2018, Target4Green will be continuing to promote and run three specific but inter-related whole school engagement programmes for schools in the UK and overseas.
- All programmes offer students and teachers the opportunity to develop vital knowledge, skills, values and attitudes related to local and global issues; empowering a sense of understanding and responsibility within the wider world.

### Testimonial:

‘With the wonderful news of us being awarded our Green Flag Status, I wanted to say THANK YOU for all your help along the way. Not just the Eco-Symposium but the gentle steering and good advice at plenty of other times too. These things have been critical and we are most grateful.’

Titus Mills, Headmaster, Walhampton Independent Preparatory School, Hampshire, UK

We focus on Awareness, Attitude, Analysis and Action as our approach to training and consultancy

With over 25 years of teaching and consulting experience, Peter Milne, Founder/Director of Target4Green Educational Consultancy and Training, provides a hands-on, whole school engagement and local community approach to supporting schools across the world in their Education for Sustainable Development and Global Citizenship initiatives and development. Target4Green is also a Global Learning Programme CPD Provider.

Target4Green brings all elements of sustainability together in thought-provoking and dynamic ways through practical workshops, seminars, team building, presentations, experiential learning opportunities and strategic partnerships.

## Recent work & initiatives

'Home to Growth and Learning'

THE AHLIYAH SCHOOL FOR GIRLS

# PROGRAMME 1: WHOLE SCHOOL ENGAGEMENT DAY IN ESD AND GLOBAL CITIZENSHIP

Target4Green offers schools a variety of Education for Sustainable Development and GC workshops and assemblies as part of a full day support programme for whole school engagement and the Sustainable Development Goals. This has already successfully run in over 40 schools internationally, including EY settings.

The full day would include:

- Review and evaluation of current practice, and assessment of water, waste and energy management
- A variety of age-related workshops and assemblies
- Eco-Committee meeting to discuss ideas for class, year group and whole school activities over the academic year .
- Staff CPD looking at curriculum linking and lesson plan ideas related to ESD and Global Citizenship.

## [Dumpton School @dumpton](#)

- Thank you [@pdmilne](#) for a full day of environmental workshops. The children found it thought provoking and very informative! [@ScienceWeekUK](#)

## Programme 2: CHILD PROTECTION: CHILDREN AND ENVIRONMENTAL RIGHTS

A half day in-school programme consisting of interactive workshops and presentations on the rights of children to have a healthy environment and a voice in their future. This will help to develop student self-awareness, reflection and empathy.

The programme includes an assembly entitled: **Environmental Problems Most Affecting Children** and smaller group workshops (best suited for students from 10-16 years old) that discuss the:

1. **The Right to a Voice**
2. **Wants vs Needs**
3. **Taking a Rights Based Approach to the Environment**

**As a GLP Provider**, the course is available free for state funded schools in England at:

<http://glp.globaldimension.org.uk/calendar/course/10700>

It is also available to independent and international schools, either as CPD or as a combination of student workshops and assemblies.

**Mobilizing School Communities Around the World on  
Climate & Sustainable Development Action and supported by:**

- Kick started in January 2016 in Dubai, Beyond COP21 Symposia are inspiring students (10-18) & teachers in **schools** across the world via a day of interactive discussions and action, around the post Paris Climate Agreement & SDGs agenda. The series will continue globally until 2030.
- A second Symposium took place at Walhampton School, UK on 16<sup>th</sup> June 2016; a third at GEMS New Millennium, Dubai on 25<sup>th</sup> September and a fourth on 16<sup>th</sup> February 2017 at Ahliyyah School for Girls, in partnership with Bishop's School for Boys and Mashrek International School in Amman, Jordan, with the Minister of Environment as a key note speaker. Further Symposia are already confirmed for Singapore ( Tanglin Trust School), UK( Wellington College ) and UAE( Ajman Academy) for 2017/18.
- The Symposium was featured in a workshop run by Target4Green at the Eco-Schools National Operators' Meeting in November 2016 in South Africa
- **Concept:** Each one day Symposium is hosted by an 'Eco'-School, with 5 to 10 other schools in the area invited to participate. The target ages are 10 – 18.

The event consists of themed high impact presentations from, and discussions with, guest speakers on the Agenda 2030 and climate negotiations in and beyond Paris; individual & community action; pledge making and practical activities/workshops.

**Local sustainable companies and organisations** are invited to showcase their initiatives and engage with students and teachers throughout the day.
